DETAILED ACTION

Continued Prosecution Application

1. The request filed on 5/15/00 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 08/580,493 is acceptable and a CPA has been established. An action on the CPA follows.

Drawings

X 2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the subject matter of claims 12-15 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

did not do 3. Further, to facilitate a better understanding of the features recited in claims 12-15, applicant is requested to point out to the examiner the corresponding disclosure of this subject matter in the specification.

✓ 3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "3" has been used to designate both the type of buffer shown in figure 1 and the type of buffer shown in figure 3, which are different types. Correction is required.

4. The proposed drawing corrections filed 5/15/00 have been disapproved because they introduce new figures 31 and 32 without a corresponding change to the specification. Also, since

Art Unit: 3726

✓ applicant has listed 9 figures in the brief description of the drawings, applicant should re-number proposed figures 31 and 32 as --10-- and --11-- in order to be consistent.

5. Allowable subject matter having been set forth in this office action, applicant is required to submit a complete set of proposed corrected drawing for the examiner's review.

Specification

X 6. The substitute specification filed 9/5/95 is objected to because it is replete with grammatical and idiomatic problems too numerous to mention individually. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

7. Claims 1-18 are objected to because of the following informalities:

✓
X In claims 1, 2 and 16, it is not clear what is meant by a support part "which is cylindrical all along". It is suggested that applicant re-word this limitation to read --providing a cylindrical support part-- as was previously indicated as being allowable over the art of record. Appropriate correction is required.
